PROJECTS

BST ADVERTISIMENT OF JOBS

Project Description: this website used to advertise job position In order to help people look for jobs online and companies to post the free job place online and have contact with the people looking for jobs, we used the window platform and used sublime text to program the website

Library management system

The LMS is used to manage asset collections and help libraries keep track of their documents inventory and loans, and it helps users find the right books and let them expand their existing knowledge base. It allows users to search for relevant books using specific keywords. It is done using SQL

Derash Digital Service Provider

Derash Digital Service Provider works to connect service providers and service seekers through a streamlined, centralized digital platform. The platform addresses inefficiencies and fragmentation in traditional service-seeking methods by offering a user-friendly website that involves three primary actors: Service Providers, Users, and Admins. Service Providers can register, log in, and complete detailed profiles that are reviewed and approved by Admins, ensuring the inclusion of only qualified professionals. Users can register, log in, and search for nearby service providers, view profiles, and read reviews before selecting a provider. After receiving services, users can leave reviews, enhancing the credibility and reliability of providers. Admins oversee the platform by approving service

providers, managing user accounts, and maintaining platform integrity.

Akabe Lawfirm

Project Description: this website connects clients and lawyers , Clients can make appointments and can send their cases to the lawyers that appear on the website. The lawyers can approve or deny the appointment or the case and notify the client using email. the lawyer posts blogs and controls the telegram channel using the website.
